

Meridian Holdings

Annual Report - Fiscal Year 2024

Meridian Holdings is a diversified industrial supply group operating across Europe, the Middle East, Africa, the Americas, and Asia-Pacific. This report summarizes financial performance and operational highlights for fiscal year 2024.

Company Overview

Founded in 1998, Meridian Holdings manufactures and distributes precision fasteners and industrial hardware through a network of regional warehouses. The company employs approximately 4,200 people across 19 countries and reports results in three geographic segments: EMEA, Americas, and APAC.

Q3 Results

The third quarter continued the growth trend established earlier in the fiscal year, with every reporting segment posting sequential gains over Q2.

EMEA

The Europe, Middle East, and Africa segment remained the group's largest contributor by revenue this quarter.

Region	Q1	Q2	Q3	Q4 (Fcst)
EMEA	3.8M	4.0M	4.2M	4.4M
Americas	5.0M	5.2M	5.4M	5.5M
APAC	2.1M	2.3M	2.5M	2.6M

All figures are reported in USD millions and are unaudited.

APAC

The Asia-Pacific segment grew 8.7% quarter over quarter, led by demand from shipbuilding customers in South Korea and Japan.

Risk Factors

Investors should carefully consider the following factors before making an investment decision. Commodity price volatility, particularly in cold-rolled steel and titanium alloy, may compress gross margin in future periods. The company is also exposed to currency translation risk given its EMEA and APAC revenue base, and to concentration risk from its five largest distributors, which together account for 34% of consolidated revenue.

Regulatory changes to cross-border fastener tariffs could increase landed cost for the Americas segment. Management does not currently hedge this exposure.
